CIEE Amsterdam, Netherlands

Course title: Dutch Public Health
Course code: PUBH 3001 NETH
Programs offering course: Business and Culture, Social Sciences and Humanities
Language of instruction: English
U.S. semester credits: 3.00
Contact hours: 45.00
Term: Spring 2021

Course Description

The Netherlands, as many other Western countries, is facing today's challenges of rising health care costs and an ageing population. In this course students will develop a better understanding of the Dutch approach to norms and standards in today's public health and health care system. The course will touch upon culturally sensitive issues such as euthanasia, public insurance, and home birth, as well as global issues such as elderly care and children's health. Through a series of thematic lectures, including guest lectures from professionals in the field, and guided site visits, students will be able to place these challenges in the specific context of the Netherlands, while also critically analyzing and comparing both the health care challenges and outcomes to those of other countries (chiefly, the United States and neighboring European countries).

Learning Objectives

By completing this course, students will:

- Demonstrate an in-depth understanding of the current structure and the historical evolution of the Dutch health care system and its principal stakeholders;
- Outline and critically assess the differing public policy approaches on health care policy that characterize both the Dutch health care system and its analogues in the United States and select European countries;
- Formulate informed and policy-based evaluations of the Dutch approach to specific health care concerns (ranging from euthanasia and abortion to women's and children's health and obesity);
- Articulate clearly the principal challenges that face both the Dutch and American health care systems, both currently and in the future, and weigh the efficacy of proposed health care solutions.

Course Prerequisites

None

Methods of Instruction

- Each theme presented will include an introductory lecture. Some of these lectures will be supplemented with guest speakers who are professionals in that specific field or a group guided site visit or group project related to that specific theme.
- Throughout the course, all students will take scheduled tests to monitor their comprehension of the themes presented and discussed. Students will be able to use the feedback from these tests to prepare for the final exam.
- In this course, students will also have two assigned papers in which they will apply their knowledge of the themes presented.
- In between class sessions, students are expected to work independently on their assignments, complete the assigned readings, and study for their scheduled tests and final exam.
- At the end of the course all students will take a final exam and will deliver a final presentation. The professor will discuss with the group the preferred means of delivering the final presentation (either individual or group presentations).

Assessment and Final Grade

1. Presentation
   20%
2. Papers
   30%

<tr>
<td>Each student is required to attend all sessions of the course and to participate</td>
</tr>
<tr>
<td>actively in class discussions and during guided site visits.</td>
</tr>
<tr>
<td>Students who make active connections to the concepts from the reading materials in</td>
</tr>
<tr>
<td>class discussions, students who actively ask questions, and students who actively</td>
</tr>
<tr>
<td>reflect on out-of-class experiences in class will receive extra points for</td>
</tr>
<tr>
<td>participation. Participation points will be deducted when students do not</td>
</tr>
<tr>
<td>participate in class or have not read the assigned reading materials before coming</td>
</tr>
<tr>
<td>to class.</td>
</tr>
<tr>
<td>Since we will be discussing culturally sensitive issues in class, the classroom</td>
</tr>
<tr>
<td>must be a safe space in which students are able to express their opinions openly.</td>
</tr>
<tr>
<td>Discriminatory comments or language of any kind will not be tolerated.</td>
</tr>
<tr>
<td><strong>Attendance</strong></td>
</tr>
<tr>
<td>Each student is expected to attend all sessions of the course and to participate</td>
</tr>
<tr>
<td>actively in class discussions. Attendance will be taken every class session by the</td>
</tr>
<tr>
<td>course instructor. Absences will be penalized according to the CIEE Amsterdam</td>
</tr>
<tr>
<td>attendance policy outlined below:</td>
</tr>
<tr>
<td>1 or 2 absences = complete 1,500 word make-up assignment</td>
</tr>
<tr>
<td>3 absences = 10 points deducted from the student’s final grade</td>
</tr>
<tr>
<td>4 absences = the student fails the course (F is listed on the transcript)</td>
</tr>
<tr>
<td>- If you arrive to class 15+ minutes late, this counts as a ½ absence.</td>
</tr>
<tr>
<td>- At all times, you need to inform the instructor – before the start of class –</td>
</tr>
</tbody>
</table>
|     of any absences. Failure to
notify the teacher in advance will result in an extra assignment.

- If you are sick (i.e. physically incapable of attending class), you may miss class, but you will have to complete a makeup assignment.
- Going on/returning from a trip are not valid excuses for missing or showing up late to a CIEE class.
- Note about all assignments: Late assignments will be marked down by 1 point (out of 10) for every day the assignment is late. Assignments that are more than 3 days (72 hours) late will not be accepted.

N.B. Course schedule is subject to change due to study tours, excursions, or local holidays. Final schedules will be included in the final syllabus provided to students on site.

**Weekly Schedule**

**Week 1**

**Class: 1.0** Introduction and History of Public Health in the Netherlands

Content: a historical overview of the three waves of development that have shaped the Dutch public health care system

Reading:

**Class: 2.0** Public health in transition

Content: politics, costs and health insurance matters in the Dutch health care system

Reading:

**Week 2**

**Class: 3.0** The Dutch health care system vis-a-vis the rest of the world

Content: A comparison of the Dutch health care system with the rest of the world

Reading:

**Class: 4.0** Guest Lecture: Migrant health care in the Netherlands

Content: Exploring the complex barriers that affect access to health of migrant populations in the Netherlands and how these relate to the rest of the world

**Week 3**

**Class: 5.0** Politics of health: WTO/TRIPS and Dutch health care

Content: An investigation into the workings of the WTO and TRIPS in relation to health access

Reading:

**Class: 6.0** Sex work in the Netherlands, a model for the world?
Investigating the benefits and limitations of Dutch policy on sex work

Reading:

Dutch Ministry of Foreign Affairs (2012); Dutch Policy on Prostitution.

**Week 4**

**Class: 7.0** Social determinants of health

Content: Understanding how different social factors lead to different health outcomes in the Netherlands and around the world

Reading:

C. Bambra et al. (2010); Tackling the wider social determinants of health and health inequalities: evidence from systematic reviews. *Journal of Epidemiology and Community Health* 64 (4): 284-291.

**Class: 8.0** Human rights approaches to health (with a focus on the Dutch model)

Content: Investigating the different ways the human rights based approach is implemented in the Netherlands and the rest of the world

Reading:

**Week 5**

**Class: 9.0** Euthanasia

Content: Debating the relative merits and demerits of euthanasia as a public health practice

Reading:

P. Sulmasy (2016); Non-faith-based arguments against physician-assisted suicide and euthanasia. *The Linacre Quarterly* 83 (3): 246-257.

**Class: 10.0** Neoliberalism and health

Content: investigating the impact of the Neoliberal agenda on public health in the Netherlands and the rest of the world

Reading:

**Week 6**

**Class: 11.0** Sexual health in the Netherlands

Content: Analyzing the uniquely Dutch approach to sexual health as evaluated by patients

Readings:

**Class: 12.0** Obesity and nutrition in the Netherlands
Week 7
Class: 13.0 Mental health

Content: Investigating the impact of the movement for global mental health in the Netherlands and the world

Reading:

Class: 14.0 Aging and elderly care in the Netherlands

Content: A look at the Dutch innovations on elderly care

Reading:

Week 8
Class: 15.0 Recreational drug use

Guest lecture: the founder of Festival Zusters will discuss his organization’s role in providing information to drug users who attend Dutch festivals and how his organization’s philosophy dovetails with the Netherlands’ focus on harm reduction as a public health strategy

Class: 16.0 Dutch drug policy

Guest lecture: Researcher at the Netherlands Drug Policy Foundation

Reading:

C. Chatwin (2016); Mixed messages from Europe on drug policy reform: the cases of Sweden and the Netherlands. *Foreign Policy at Brookings*: 1-12.

Week 9
Class: 17.0 The use and prescription of antibiotics in the Netherlands

Reading:

Class: 18.0 Final presentations (part one)

Content: Different groups present their projects after which a question and answer session follows

Readings: N/A

Week 10
Class: 19.0 Final presentations (part two)

Content: Different groups present their projects after which a question and answer session follows
