Course title: Dimensions of Health Care: Theory and Practice
Course code: PUBH 3001 CSCS
Programs offering course: Advanced Liberal Arts, Business and Society, Communications, New Media and Journalism Spanish, Liberal Arts
Language of instruction: Spanish
U.S. semester credits: 3.00
Contact hours: 45.00
Term: Fall 2020

Course Description

This course enables students to define, interpret and apply theoretical concepts as well as basic practices in Epidemiology and Public Health, providing a comprehensive understanding of the current situation of welfare, health and social systems in Andalusia, Spain and Europe at large. The course offers a critical approach to the benefits and challenges of such a complex system, its beneficiaries and the administrations and professionals who deliver its vast services. Fundamental notions of social justice and equity are intrinsically connected to the main topics discussed in this course.

Learning Objectives

By completing this course, students will:

- Defend the concept and functions of public health care through analysis of its historical evolution and critique of current models.
- Engage in a comprehensive understanding and analysis of the current situation of welfare, health and social systems in Andalusia, Spain, and Europe at large.
- Judge the current status and perform an analysis of public policies, with special emphasis on the health sector and social services.
- Analyze the health status of various populations in order to identify problems, their determinants and the specific needs of different groups.
- Discern the different methods and techniques of epidemiological and social research, applicable in Public Health and Service Management to understand and modify undesirable health situations, and adapt the styles and procedures of service management.
- Differentiate the population’s principal health problems paying special attention to cardiovascular risk factors, cancer and HIV/AIDS. Study of public health in developing nations.

Course Prerequisites

This course will be especially useful for students studying health science, sociology, epidemiology or other related fields.

Methods of Instruction

This course contains two basic elements- theory and practice.

- Theory: The explanations in the classroom will address the theoretical, historical and contextual aspects of Public Health. Different readings will be assigned to complement the topics that will be discussed during the class and, whenever possible, the course will use audiovisual material, web pages. Guest lecturers and visits outside the classroom will also be included in this course.
- Practice: Students will apply the knowledge gained in the classroom.

ACTIVITIES OUT OF THE CLASSROOM

- Visit to the University Hospital Virgen Macarena
- Visit to a Senior Center

Linguistic Resource Center
Students can use the Writing Center.

**Assessment and Final Grade**

1. **Assignments** 20%
2. **Midterm Exam** 25%
3. **Final Exam** 35%
4. **Participation** 20%

**TOTAL** 100%

**Course Requirements**

**Assignments**

Quality of the summary and expression of opinion in the case of readings. And in general, correction and level of work done, punctuality in delivery.

Students will have to submit a total of four assignments.

- 2 essays (in Word) on the visits to the old age home and the hospital: the students must write a summary and give their opinion about each visit.
- PowerPoint Presentation:
  - Explanation of the national health system
  - Health education program.

**Midterm Exam**

Each correct response is worth .2 points (maximum 10 points),

50 multiple choice questions (4 choices).

**Final Exam**

Each correct response is worth .2 points (maximum 10 points),

50 multiple choice questions (4 choices) based on content from the second half of the course. If the student does not pass the midterm, the final exam will be cumulative.

**Participation**

Attendance, interest, active participation, attitude, completion of tasks.

**Attendance**

Students are not allowed to miss class for unjustified reasons. For each unexcused absence, the participation portion of the grade will be lowered. Hence, it will be very difficult to receive a 100 in the class. Please keep this in mind.

If a student misses class twice without a valid excuse (a note from a physician in the event of an illness), then the professor will automatically lower the final grade by 5 points (on a 100-point scale) for each class missed thereafter. Students with 6 or more unexcused absences will fail the course. Students should arrive to class on-time. Arriving more than 15 minutes late for a class will count as an unexcused absence.

Please note that an excused absence is one that is accompanied by a doctor's note: signed stamped and dated. Travelling and/or travel delays are not considered valid reasons for missing class.

**Academic Honesty**

Students are expected to act in accordance with their university and CIEE's standards of conduct concerning plagiarism and academic dishonesty. Use of online translators for work in Spanish will result in an automatic failure.

N.B. Course schedule is subject to change due to study tours, excursions, and local holidays. Final schedules will be included in the final syllabus provided to students on site.
Weekly Schedule

Week 1
Class:

- Presentation of the course objectives.
  - Introduction to basic concepts about public health. During the first week we will focus on giving students an introduction to the concept of public health. We will try to understand what Public Health is and its evolution over history.
  - Health Systems Models
