

CIEE Amsterdam, Netherlands

Course title:	Business and Sustainability in the Netherlands
Course code:	BUSI 3004 AMNT
Programs offering course:	Social Sciences and Humanities, Business and Culture, Summer Business and Communications
Language of instruction:	English
U.S. semester credits:	3
Contact hours:	45
Term:	Fall 2020

Course Description

The Netherlands is known for its excellence in sustainable business practices, boasting both national and global companies recognized for promoting and championing sustainability. This program is designed for students interested in learning more about the new, up and coming world of sustainable business, in a country of unique cultural and societal characteristics. A combination of classroom work with guest lectures and company visits/excursions will provide students with firsthand experiences that will allow them to better understand how Dutch history (e.g. fight against rising sea levels), culture (e.g. practical problem-solvers), and society have shaped the development of a sustainability-focused business culture. The four themes included in this course are all important determinants of the Dutch sustainable business culture. The course starts off with the exploration of the Dutch culture. This will be done from a quick view on the Dutch historical context and also from a social and cultural perspective. The second part focuses specifically on sustainability. This is a multidisciplinary analysis of topics ranging from Dutch ethics to for-profit business strategies. The third section will provide concrete examples of profitable sustainable businesses and the Dutch Business culture and leadership. The fourth part of the course will focus on responsible investment and future sustainable business trends. Themes include: the establishment of The Netherlands, Dutch tolerance, the Dutch Polder Model, sustainability, circular economy, Public-Private-Partnerships, creating new supply chains, sustainable business in The Netherlands and responsible investment.

Learning Objectives

By completing this course, students will:

Through the “Business and Sustainability in the Netherlands” course, students have the opportunity to learn more about principles of sustainability in the Dutch business field, leading to a deeper understanding of the development of Dutch business practices.

At the end of the course student will have developed:

- Deeper knowledge on how the cultural history has led to innovative models and leadership practices in the Netherlands;
- Business management skills critical to the governance of sustainability both in today’s contemporary world and in the future;
- Deeper knowledge of the political framework and economic climate that encourages sustainability in the Netherlands, comparing it to the European, and US agendas;
- Critical and analytical thinking applied by discussing successful case studies, sustainability in business, across companies’ value chains;
- Skills to think strategically about business and sustainability;
- Critical and analytical thinking;

- Scientific writing skills.

Course Prerequisites

None

Methods of Instruction

This course runs for 14 weeks, meeting twice a week for 2 hours. The lectures are divided into four themes. Each theme covers more or less four weeks and will be introduced by the lecturer. After an introductory class, the other classes will be a combination of company visits, experts' presentations, lectures, group discussions and exercises to have the students fully emerge in the topic and to get an insider's perspective. Each theme ends with a paper assignment, a test or a presentation to lock-in the findings and conclusions of each topic.

Assessment and Final Grade

1.	2 Thematic Papers	20%
2.	Test	25%
3.	Final Presentation	20%
4.	Final Paper	20%
5.	Class Participation	15%
	TOTAL	100%

Course Requirements

2 Thematic Papers

Thematic Paper 1: Dutch Business and Society (10% of the final grade)

Students will write a paper at the end of theme 1 in which they will argue about the influence of historical events on the development of Dutch modern society. This paper will make a general assessment and will focus on a specific theme to support its point. The literature suggested in theme 1 should be used as the basis for this paper, other literature will also be allowed as reference. It is important that the student is up to date with the reading. The paper must be 1,000 words in length. This paper has to be written individually and uploaded to Canvas as a Word document.

Thematic Paper 2: Sustainability and Profitability (10% of the final grade)

Students will write a paper at the end of theme 2 in which they will write about their understanding on sustainability. They will argue if Dutch and multinational companies are really becoming more sustainable and if they are remaining competitive. This paper will make a general assessment and will focus on a specific theme to support its point. The literature suggested in themes 1 and 2 should be used as the basis for this paper, other literature will also be allowed as reference. It is important that the student is up to date with the reading. The paper must be 1,000 words in length. This paper has to be written individually and uploaded to Canvas as a Word document.

Test

Students will need to answer 20 questions (4 open and 16 multiple choice) based on the readings from Themes 1 to 3. It is important to be up to date with the readings to be able to answer all the questions successfully.

Final Presentation

Students will be asked to prepare a presentation based on the UN Sustainable Development Goals showing the future they wish to live in, 10 years from now. The students will be invited to explain their visions, make direct links with present events and their future perspectives, and reflect on what they can do to get there, taking into consideration the discussions and topics covered by the course. Instructions on content and format will be given in class. For more information, consult the Annex.

Final Paper

Based on the UN Sustainable Development Goals (SDG's), students will present a plan to achieve a project goal related to the future they want to live in and the business they want to work for or create. The students will use different tools to write this final assignment.

The paper will be 2,500 words long and will consist of two parts:

1. The vision of the world they want to live in and the business they want to work for or create. This vision should be linked with events in the present, showing a correlation with their future perspectives;
2. Explaining the choice of the IMPACT to be created and the SDG's that they will focus on.

The working tools and the SDG's will be explained in class and a concrete case will be discussed. The final assignment has to be written individually and uploaded to Canvas as a Word document. For more information, consult the Annex.

Class Participation

Students who make active connections to the concepts from the reading materials in class discussions, students who actively ask questions, and students who actively reflect on out-of-class experiences in class will receive extra points for participation. Participation points will be deducted when students do not participate in class or who have not read the material before coming to class.

Attendance, class participation and classroom policies

Each student is expected to attend all sessions of the course and to participate actively in class discussions. Attendance will be taken every class session by the course instructor. Absences will be penalized according to the CIEE Amsterdam attendance policy outlined below:

1 absence = allowed

2 absences = extra assignment (1 page in consultation with the instructor)

3 absences = 10 points (out of 100) are deducted from the student's final grade

4 absences = the student fails the course

- If a student comes in 15-30 minutes late to class, this counts as a ½ absence.
- At all times, the student needs to inform the instructor – before the start of class – in case he or she will incur an absence. Failure to notify the teacher in advance will result in an extra assignment.

- Note about all assignments: Late assignments will be marked down by 1 point (out of 10) for every day the assignment is late. Assignments that are more than 3 days (72 hours) late will not be accepted.

Students who make active connections to the concepts from the reading materials in class discussions, students who actively ask questions, and students who actively reflect on out-of-class experiences in class will receive extra points for participation. Participation points will be deducted when students do not participate in class or have not read the assigned reading materials before coming to class.

Since we may be discussing culturally sensitive issues in class, the classroom must be a safe space in which students are able to express their opinions openly. Discriminatory comments or language of any kind will not be tolerated.

Laptops are allowed, but only when they are used to take notes or to look up information directly related to the class discussion. The instructor reserves the right to prohibit laptop use in case this distracts other students or this privilege is abused.

Important: Please note that in case you are not present for a pop quiz or the final exam -- or fail to hand in a response paper on time because of illness -- you are required to hand in a written doctor's note with your teacher.

Resits are not offered for CIEE courses.

N.B. Course schedule is subject to change due to study tours, excursions, or local holidays. Final schedules will be included in the final syllabus provided to students on site.

Attendance

Weekly Schedule

Week 1

Class 1.1 Dutch History

Introduction to the course: students will introduce themselves and will share their expectations and learning goals. Simone will explain to the students how the course will develop and the course main objectives. We will check the Canvas and the syllabus together to make sure everything is well understood.

Class 1.2 Dutch History (continued)

Dutch history and trade: the students will learn about the Dutch Golden Age. We will discuss Dutch history, the power of Dutch trade, the Tulip Mania (first economic bubble in the world) and cultural aspects of Dutch society.

Read: de Jong, Joop, "The Dutch Golden Age and Globalization: History and Heritage, Legacies and Contestations", Maastricht University, December 2011

Week 2

Class 2.1 Dutch Traits and Hofstede Model

Dutch Traits: students will learn about the way of doing business in the Netherlands and about the “Dutch Miracle” from the 1980’s based on the Dutch Polder Model. Students will learn about Dutch policies and the legal system. We will also discuss themes regarding drugs, euthanasia and prostitution.

Read: van Zanden, J., “The Economy of the Polder”, chapter 2 from the book Discovering the Dutch, Amsterdam University Press, 2010.

Class 2.2 Dutch Traits and Hofstede Model (continued)

The Hofstede Model: students will learn the Hofstede Model and aspects of the Dutch working life (e.g. part-time work, gender issues, religious diversity). A comparison between Dutch and US American work and life-balance will be drawn.

Read: Hofstede, G., “Dimensionalizing Cultures: The Hofstede Model in Context”, International Association for Cross-Cultural Psychology, Universities of Maastricht and Tilburg, The Netherlands, 2011.

Week 3

Class 3.1 The New Economic Model and Scientific Writing

New Economic Model: students will learn about Dutch Competitiveness (based on the Global Competitiveness Index). Here we will analyze how a country with a strong welfare state can still be a competitive nation business-wise and be economically resilient.

Read: Schwab, Klaus, “The Global Competitiveness Report 2017–2018”, World Economic Forum, 2018.

Class 3.2 The New Economic Model and Scientific Writing (continued)

Scientific Writing: students will learn how to write a scientific paper and do some class exercises. This class is important for students to understand how to write their grading papers, including their final work.

Check website: <http://www.apastyle.org>

Week 4

Class 4.1 Transition Management Theory and Visit B.1

Transition management: is a governance approach that aims to facilitate and accelerate sustainability transitions through a participatory process of visioning, learning and experimenting. Students will learn how applied transition management is changing business reality in the Netherlands.

Read: Loorbach, D. and Rotmans, J., “The practice of transition management: examples and lessons from four distinct cases”, Elsevier, 2009.

Class 4.2 Transition Management Theory and Visit B.1 (continued)

At B.1 students will learn about a unique start-up culture that is booming in Amsterdam. Students will also visit a start-up company established at B.1 (Moovs), talk to the CEO and learn about differences between Dutch and US business cultures.

Check both websites: <http://b-buildingbusiness.com/amsterdam/b-1/>

<https://www.moovs.nl/en/>

Deadline: Thematic Paper 1

Submit thematic paper 1 before 9:00 via Canvas (Word)

Week 5

Class 5.1 Shareholder vs. Stakeholder Theories

Shareholder vs. Stakeholder: the students will learn about the differences between the Shareholder and Stakeholder theories. How different styles of capitalism forms have been implemented worldwide, their successes and short-comings.

Read: Friedman, M. "The Social Responsibility of Business is to Increase its Profits" and Freeman, "Stakeholder Theory and The Corporate Objective Revisited".

Class 5.2 Shareholder vs. Stakeholder Theories (continued)

Stakeholder's power and transparency: the teacher will recall the stakeholders concept explained before, discuss the importance of engaging with them in the digital era and show a case where stakeholders have changed the way the company reports on financial risks.

Read: Mitchell, R., Agle, B. Wood, D. "Toward a Theory of Stakeholder Identification and Salience: defining the principles of who and what really counts", Academy of Management Review, October 1997, vol. 22, pp. 853-886.

Week 6

Class 6.1 Shared Value Creation and Value Chains

From CSR to Shared Value Creation: students will take a journey through the evolution of sustainability concepts applied to business, from CSR to Shared Value Creation.

Read: Porter, M. and Kramer, M., "Creating Shared Value: How to reinvent capitalism and unleash a wave of innovation and growth", Harvard Business Review, 2011

Class 6.2 Shared Value Creation and Value Chains (continued)

Thu 14 Mar (09:00 – 11:00)

Value Chains: based on the work of Michael Porter, we will discuss value chains and how to create competitive advantage in different activities.

Read: Value Chain summary of Michael Porter's book "Competitive Advantage: Creating and Sustaining Superior Performance", 1985.

Week 7

Class 7.1 Sustainable Supply Chains and Circular Economy

Sustainable Supply Chains: students will learn about Value Chains and how companies are now focusing on more Sustainable Supply Chains. The importance of traceability and fair-trade schemes for a resilient supply chain.

Read: Building Green Global Value Chains, OECD Green Growth Papers, April 2013

Class 7.2 Sustainable Supply Chains and Circular Economy (continued)

Circular Economy: the students will have an introduction to Circular Economy based on the Ellen McArthur Foundation. We will also discuss Dutch Circular Business examples in class.

Read: chapter 2 "From Linear to Circular" from the Ellen MacArthur Foundation book Towards the Circular Economy, 2013.

Deadline: Thematic Paper 2

Submit thematic paper 2 before 9:00 via Canvas (Word)

Week 8

Class Reading Week - No class

Week 9

Class 9.1 Circular Economy in the Netherlands

Guest lecture: Marjolein Brasz (Amsterdam Economic Board) (tbc)

Marjolein will talk to the students about the circular initiatives in the Amsterdam Metropolitan Area and about the circular and marketing/communications program of the Amsterdam Economic Board.

Read: Cramer, J. "Key Drivers for High-Grade Recycling under Constrained Conditions", Copernicus Institute of Sustainable Development, Utrecht University, The Netherlands,

28 April 2018

Class 9.2 Circular Economy in the Netherlands (continued)

The Dutch Sustainable Growth Coalition and the implications on policy making in the European Union: the students will learn about the DSGC and how the big 8 Dutch multinational corporations are working together with the Dutch government to create sustainable policies across the globe.

Read: Dutch Sustainable Growth Coalition, “Circular Economy: DSGC companies on their journey of implementing circular business models”, The Netherlands, 2015

Week 10

Class 10.1 Visit AkzoNobel

Visit AkzoNobel Center

Address: Christian Neefstraat 2, 1077 WW Amsterdam

André Veneman, the Director of Sustainability at AkzoNobel, will talk to the students about the company, its sustainable strategies and about the relationship with the Dutch Sustainable Growth Coalition.

Check: <https://www.akzonobel.com/en/about-us/what-we-do/sustainability>

Class 10.2 The United Nations Sustainable Development Goals

UN SDG's and the OECD guidelines: we will discuss in class the Sustainable Development Goals of the United Nations and how they are influencing Dutch businesses and decision making.

Check the UN website:

<https://www.un.org/sustainabledevelopment/sustainable-development-goals> and read through all 17 SDG's.

In this class we will also talk about the guidelines that are influencing businesses across Europe, in particular the OECD guidelines, and how this is influencing companies to write and present their reports.

Read: OECD guideline for multinational enterprises, 2011 - from page 13 to 30

Week 11

Class 11.2 Test

Week 12

Class 12.1 Responsible Investment

Guest Lecture: Lucian Peppelenbos

We will talk about Dutch responsible investment. Lucian Peppelenbos will talk to the students about APG, a Dutch financial service provider, and how the institution is shaping Dutch companies' perception towards sustainability.

Read: ABP responsible investment report 2016

Check: <https://www.apg.nl/en/who-is-apg>

Class 12.2 Responsible Investment (continued)

Drivers for Responsible investment and history: students will learn about investors' drivers for sustainable investment criteria and the increase of importance of intangible values of companies (listed in the US stock exchange). They will also learn main stream private investors' reflections on long term value creation (Black Rock).

Read: Global Sustainable Investment Review, Global Sustainable Investment Alliance 2016.

Week 13

Class 13.1 Dutch Food Sector and Sustainable Business Trends

Dutch Agribusiness and food sector: the students will learn about the Dutch food and agribusiness sector. We will talk about the food sector and intelligent agriculture in the Netherlands, particularly about the energy positive greenhouses and related integrated systems. We will also discuss sustainable issues related to Dutch supermarkets.

Read: Berkhout, P. "Food Economic Report 2017 of the Netherlands", Wageningen University and Research, 2018.

Class 13.2 Dutch Food Sector and Sustainable Business Trends (continued)

Sustainable Business Trends: students will learn about global trends for the next 3-10 years and will learn about how trends can affect different industries.

Read: Global Forces, Mckinsey & Company, 2017 number 2. From page 12 to 21.

Week 14

Class 14.1 Final Presentations

Envisioning the Future: students will be invited to prepare a collage with the elements representing the future they wish to live in, 10 years from now. We will discuss in class the final presentation and final paper. We will also work together.

Envisioning the Future: individual presentations

Deadline: submit the final presentations via Canvas

Class 14.2 Dutch Food Sector and Sustainable Business Trends (continued)

Envisioning the Future: individual presentations

Deadline: submit the final presentations via Canvas

Deadline: submit final paper before 9:00 via Canvas (Word)
