Course Description

CIEE students with advance proficiency in the Chinese language may choose the organizational internship project, which also provides a unique structured work assignment coupled with academic activities. While working at the internship site will enable you to gain experience at a local organization and enhance your language and culture learning through more interaction with people in different fields and working environments, the academic component will provide the adequate mechanism for the assessment of your learning and assist you in gaining greater understanding of a particular issue area related to your work experience. Students doing this project need to record their experiences in a journal, which is evaluated weekly, and complete a research paper that describes what they have learned during their experience at the organization.
